PROFESSIONAL SUMMARY

Computer Science (AI and ML) undergraduate with strong foundations in Data Structures and Algorithms, Java, Spring Boot, and modern AI systems. Experienced in developing production-oriented applications using Retrieval-Augmented Generation (RAG), vector databases, and LLM APIs, with a passion for building scalable backend solutions.

EDUCATION

DIT University	2023 – 2027
Bachelor of Technology	
Computer Science Engineering (AI & ML)	CGPA: 7.09

TECHNICAL SKILLS

Languages: Java • Python • JavaScript • SQL • HTML • CSS
Frameworks: Spring Boot • REST APIs • Maven • MySQL
AI / ML: Gemini API • RAG • Qdrant • PyTorch • OpenCV
Tools: Git • GitHub • Docker • Postman • VS Code

PROJECTS

Student Notes AI Assistant

- Developed a scalable backend application using Java, Spring Boot, and MySQL that enables students to upload educational PDFs and interact with them through natural language.
- Built a complete Retrieval-Augmented Generation (RAG) pipeline by integrating Gemini Embeddings with Qdrant Vector Database for semantic document search.
- Implemented automated PDF parsing, intelligent text chunking, embedding generation, and vector storage to improve retrieval accuracy.
- Designed RESTful APIs for document upload, processing, and AI-powered question answering with efficient backend architecture.

IndustrialBrain AI

- Developed an enterprise AI assistant capable of indexing thousands of technical document chunks using vector embeddings for fast semantic retrieval.
- Reduced information lookup time by replacing manual documentation search with AI-generated contextual answers powered by Retrieval-Augmented Generation (RAG).

HACKATHONS

- ET AI Hackathon
- Amazon ML Challenge

ACHIEVEMENTS

- Solved 500+ Data Structures and Algorithms problems on LeetCode.
